

Announcing the New MMH Portal!

We are happy to announce the launch of our new **Michigan Model For Health™** website portal for teachers, educators, and curriculum coordinators!

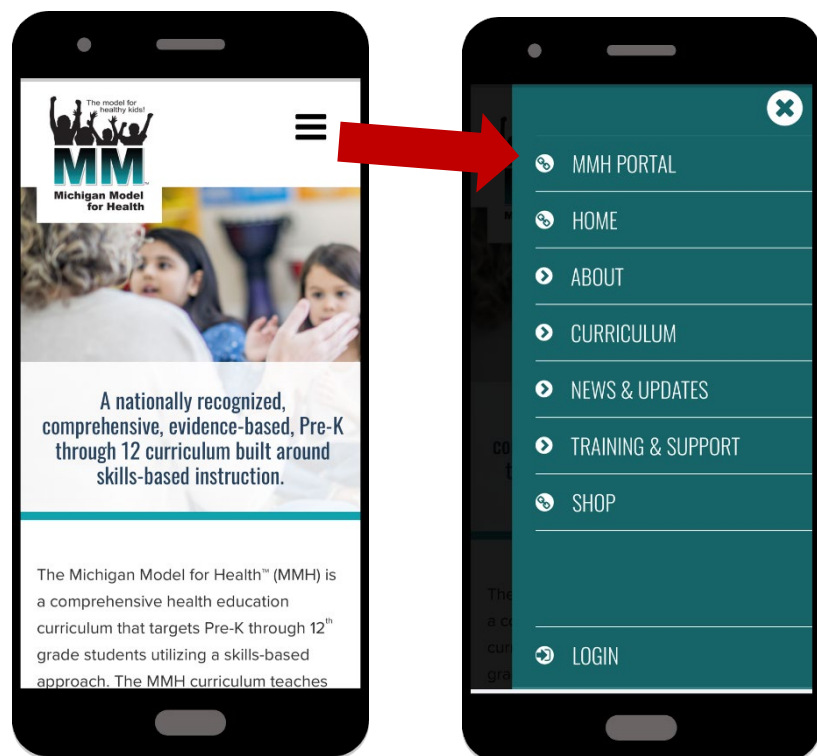

Since the launch of the new digital format for the K-12 health curriculum in 2020, once again, the MMH Program continues to evolve to meet the online needs of its health education partners. The MMH Portal is a one stop shop for all partner needs to access the digital curriculum and online resources.

The portal was created in response to new MMH resources released including a revamped **online training module** to support MMH implementation in the classroom, and a future launch of **student online lessons** for Grades 7-12 alcohol, tobacco, and other drugs health unit to use within the classroom and/or virtual instruction. In addition, the changes incorporate teacher and health coordinator feedback to have resources and important links in one central location that is presented in a uniform way to offer quicker and easier access.

On **October 26, 2022**, all partners who have an account in the MMH website will see the new portal page.

Go to: <https://michiganmodelforhealth.org>

The **MMH Portal** link will be added at the top of the mobile menu.
